

Captions Unlimited of Nevada, Inc.

Providing....

- **REALTIME captioning services Nationwide**
- **REMOTE CART and remote captioning services seamlessly Nationwide.**

Communication Access Realtime Translation (CART) is the instant translation of the spoken word into English text using a stenotype machine, notebook computer and realtime software. The text appears on a computer monitor and can also be displayed for large groups using a projector or Data Wall. CART is also often referred to as realtime captioning.

- The Southern Institute on Children and Families
- U.S. Administration on Aging
- American Legion

Realtime Captioning...

Live and Remote

By utilizing state-of-the-art technology, Captions Unlimited is able to offer remote captioning or instantaneous streaming text through an Internet-based system. This technology may be used for conventions, business meetings, public hearings, religious services, doctor's appointments, depositions, courtroom proceedings, or in classrooms.

As a physician, you can now speed up your appointments with your patients who are hard of hearing or deaf. In the past, the only way physicians could communicate with their deaf/hard of hearing patients was through pen and paper. Now there is remote CART that can be set up in minutes and is totally seamless.

WHY USE CART AND REMOTE CART?

- ❖ Pool of Experienced CART providers with extensive CART medical dictionaries
- ❖ Instantaneous streaming text via the Internet
- ❖ State-of-the-art technology
- ❖ Effective Communication
- ❖ Transcript upon request
- ❖ Friendly Staff

Ease of Use...

With the click of a button, the consumer will "meet" the CART provider on the Internet, viewing simultaneous streaming text as the words are spoken. You will be sent via email a "Link" to access the streaming text. The CART provider will call the designated telephone number and begin streaming the text as it is spoken.
